

# CFA® Exam Tips – LEVEL II

## Study Tips

### General Tips

Tip	Elaboration
<b>Make your own study notes and summary</b>	Even if you can find many different condensed summaries and formula sheets, they will not be as good as your own notes because you know your strengths and weaknesses the best. You can tailor make your notes by adjusting the depth and breadth for your own need. That would be helpful in your final review in the last few days.
<b>Plan to finish the whole syllabus ahead of time</b>	You will need to go over the topics several times in order to familiarize yourself with the details. Practising with question bank is needed.
<b>Have a clear mind on the exam day</b>	Manage your exam time wisely. All questions are of equal value. Don't spend too much time on a particular question. Accept the fact that you may not know all the questions. For those you don't know, make an educated guess and move on.
